

Internship JD – Development Intern (Web/App)

A Development Intern contributes to building and maintaining applications, websites, and digital tools. This role combines technical learning with hands-on coding to support real project needs.

Key Responsibilities:

- **Code Contribution:** Assist in writing, testing, and debugging clean, efficient code.
- **Feature Development:** Support the team in building small modules or features for projects.
- **Bug Fixes:** Identify and resolve minor issues under mentor guidance.
- **Collaboration:** Work with designers and marketing teams to bring digital experiences to life.
- **Documentation:** Maintain proper records of code, processes, and solutions.

Skills & Tools:

- Languages: HTML, CSS, JavaScript, Python, or any one programming language.
- Tools: Git/GitHub, VS Code, Postman (for APIs).
- Basic Knowledge: Web development concepts, databases, or frameworks (React, Node.js basics is a plus).
- Problem-Solving: Logical thinking and eagerness to learn new technologies.

Common Related Job Titles:

- Web Development Intern
- Software Development Intern
- Frontend/Backend Intern
- Full Stack Developer Trainee
